

RE: Optimizing your images for website display

As you know, it is essential for all web graphics to load quickly on a website.

With that in mind, if you wish to have your graphics/images displayed on our website to showcase your upcoming exhibit, please submit all graphics/images electronically in the smallest size file as possible without compromising image quality. Photoshop has a "Save for Web" option you might find useful.

During your exhibiting month, we display a “Currently on Exhibit” widget on our sidebar which requires at least 3 Landscape Oriented graphics/images of your work. Please review our website at www.longmeadowlibrary.org to view our current postings.

Thank you.
